The most affordable in-flight
Smartphone solution and no global
roaming charges.

Make your Smartphone even smarter

BizjetMobile provides an alternative approach for passengers to use their mobile phones onboard aircraft, without the requirement to install complex and expensive conventional mobile phone hardware.

- A patented Smartphone App.
- Uses Bluetooth which is fast and documented as safe for use in aircraft.
- Operates in Flight Mode and connects your Smartphone via the aircraft satellite link.
- Works with any aircraft server, notebook or tablet.
- No special hardware or certification required.
- Have the convenience of your own Smartphone and no roaming charges.

System Comprises:

1. Phone App
2. Notebook or Server Software
3. Noise cancelling headset
4. SATCOM voice interface

Compatible with:

1. Iridium
2. Inmarsat
3. Thuraya
4. Aircell or Ku band
